

## IALHA SALE OF SEMEN FORM

The owner of a stallion may sell straws of frozen semen for use by others in producing foals that may be registered by the IALHA. The straws should be labeled with the name, registration number of the stallion and the name of the owner of the stallion. The stallion owner must provide the purchaser of the semen with a completed and signed IALHA "Sale of Semen" form and/or other written document. The purchaser of the semen must provide a copy of the Sale of Semen form along with the IALHA registration forms needed for the registration of foals created by the use of this semen. The owner of the semen shall sign as the stallion owner for the purpose of registration of foals created by the use of this semen. Failure to obtain the required signatures and provide a copy of the "Sale of Semen" form and/or any other written document shall render the foal ineligible for registration.

Note: The IALHA Registry Board recommends that, when selling or buying frozen semen, any terms of agreement not found in this IALHA "Sale of Semen" form must be explicitly stated in a separate contract to be signed by both parties.
